

MEDICAL MYSTERY FESTIVAL

PRE-VISIT PAGE (GRADES 1-5) 90 minutes

In preparation for our visit with the Medical Mystery Festival, please consider the following list of our needs. In order to maximize the organization and success of this program, it would be helpful if these items were ready when the Arizona Science Center staff arrives:

- **A room with a wheelchair-type access to be able to bring in our equipment on rolling carts**
- **A person to receive our staff and allow them into the cafeteria/gym sized room. We arrive approximately 1 ½ hours before the start of the program. The MMF takes approximately an hour to set up.**
- **12 tables set up in a horseshoe-type pattern around room (see diagram below)**
- **Easy access to a water source (large sink)**
- **At least 10 volunteers available ½ hour before program for a brief introduction to the stations. The role of the adult volunteer is to assist the students in the activities and monitor the festival stations. NOTE: The success of this program is dependent on having enough adult volunteers! We cannot conduct the festival without them and will cancel if this is the case.**
- **A teacher guide is provided. It contains pre and post festival activities to be conducted with the students in the classroom (if done during school hours). Reminder: program is limited to 90 participants!**
