ARIZONA SCIENCE CENTER WELCOMES NEW IMAX® FILM, SPACE JUNK 3D
GoDaddy Steps Up to Sponsor Fun Science Education Project

PHOENIX (9/17/13) – Arizona Science Center is excited to present its newest film, *Space Junk 3D*. Recognized with the Grand Prize in Paris at the most prestigious festival for 3D motion pictures, *Space Junk 3D* is the first movie to explore the exponentially expanding ring of debris that threatens the safety of our planet's orbits.

Narrated by Academy Award® Nominee Tom Wilkinson, *Space Junk 3D* harnesses the magical imagery of the 3D giant screen to take viewers soaring—from the stunning depths of Meteor Crater to an unprecedented view of our increasingly crowded orbits 22,000 miles above earth.

“Space has always been a source of wonder for humankind,” said Chevy Humphrey, President and CEO of Arizona Science Center. “The film is a fascinating look at how space exploration and commercial efforts may have serious unintended consequences.”

GoDaddy, the world's largest platform for small businesses is the local presenting sponsor of the film which runs until Feb. 6, 2014 in Arizona Science Center's IMAX® Irene P. Flinn Theater. It shows daily at noon, 2 p.m. and 4 p.m.; details and pricing at AZScience.org.

“This is a film that is produced to be both educational and fun ... that's the way we think about science at GoDaddy and we want to see more kids interested in topics like science, technology, engineering and mathematics,” said GoDaddy Chief Technology Officer Elissa Murphy. “GoDaddy has been supporting science-oriented education projects for years because we are absolutely passionate about educating a future generation of scientists and engineers right here in our community.”

Teachers can also obtain an educator's guide that presents a historical timeline of satellite launches and the background science of orbital mechanics to help learners understand the physics of space junk. It includes hands-on activities and a complete presentation of how the film can be used to support classroom learning in context with the National Science Education Standards.
