“We are excited to bring this blockbuster exhibition to Phoenix. The exhibition tells a fascinating story with content for all ages – it covers archeology, geology, earth science, art history, culture and more. Hosting exhibitions like this is one way we inspire, educate and engage curious minds through science, which is what we work to do every day.”

-- Chevy Humphrey, The Hazel A. Hare President and CEO, Arizona Science Center

“I first saw the exhibition in Los Angeles and my immediate reaction was ‘We have to have it.’ You’re taken back in time to 79 A.D. as you walk room by room. You’re seeing over 200 perfectly preserved artifacts from wall-sized frescoes, mosaics and marble sculptures to jewelry and Roman coins. Then you see the 6 exquisite body casts that vividly communicate the emotion of the day Mount Vesuvius erupted. You get a full understanding of the history, the drama and the importance of what happened there.”

-- Chevy Humphrey, The Hazel A. Hare President and CEO, Arizona Science Center

“There is a level of reverence that comes over you when you see the body casts. It reminds you that we are powerless over nature. You get chills because that could be you.”

-- Chevy Humphrey, The Hazel A. Hare President and CEO, Arizona Science Center

### Available Quotes

“One of the best things about this exhibition is that it opens up cross-generational dialogue about culture, history and life when you bring the whole family. You get kids, siblings, parents, grandparents, all asking questions. The content in this exhibition encourages those connections and facilitates conversation because what you see can affect anyone.”

-- Chevy Humphrey, The Hazel A. Hare President and CEO, Arizona Science Center

“This truly is history preserved. The setting is gorgeous. It feels like you are transported to another place – moved not just in time, but physically taken to the city of Pompeii, walking through the streets of the town before Mount Vesuvius erupted.”

-- Sari Custer, VP of Curiosity, Arizona Science Center

“We are curious about things we don’t understand. This exhibition is a perfectly preserved peek at a town that was literally buried under earth for 2,000 years.”

-- Sari Custer, VP of Curiosity, Arizona Science Center
