DIY NATURE JOURNAL

Nature is all around us, and all we have to do is take some time to look around! A nature journal is a great way to express yourself, and the natural world. You just need a few materials, and a good spot to sit. This activity can be done from your front or backyard to a park or a hiking trail. Use all 5 of your senses when creating a nature journal! Observational skills in nature are essential to a lot of environmental science jobs. Park rangers, biologists, hydrologists, ecologists, and more, all have to look at natural systems to learn about how they change and if they are at risk.

Supplies

- Notebook or Paper
- Pencil, crayons, colored pencils, or markers
- Tape or glue
- Scissors
- Assorted nature materials (leaves, flowers, sticks, etc)

Challenge

Starting Your nature Journal

1. Find a spot in nature - this can be your front yard, back yard, park, hiking trail, etc.
2. Each page in your journal can utilize a nature prompt. Get creative! Follow the prompts below for a start:
3. Find 5 different plants and tape them into your nature journal: what color are they? How many leaves do they have? What shape are the leaves?
4. Draw 3 animals you see or hear.
5. Draw one insect - where does this insect live? What does this insect eat?
6. Illustrate your favorite activity in nature, or your favorite memory of being in nature.
7. Can you find animal tracks, scat, or burrows? Draw them in your journal
8. Nature free write - what do you like about nature? How does it make you feel?

Questions

1. What does nature mean to you?
2. What other prompts can you include in your journal?
3. What are other ways to observe and immerse yourself in nature?
