

# RECYCLED CRAYONS

Recycle your old crayons to make new ones unique to you! Use molds in different shapes to create a personalized coloring experience—all from the power of the Sun.

## SUPPLIES

- Unwrapped crayons or pieces of old crayons
- Silicone mold or a Dixie cup
- The Sun!

## ACTIVITY

1. Make sure all crayons have the wrappers removed.
2. Break crayons into small pieces, or use small or broken crayons. Adults can use a cheese grater to get crayons into smaller pieces.
3. Place crayon pieces into the mold or Dixie cup.
4. Put molds or cups outside on a sunny day. Leave out for 2-4 hours, or until they have fully melted.
5. Once melted, bring inside and allow them to cool.
6. Once the crayons have hardened, take them out of the mold.
7. Use your new Crayons on your next coloring project!

SHARE YOUR CREATIONS WITH US!
